What We Do

Environmental Assessment

With our team, we provide environmental assessment which supports the planning and decision-making through the environmental assessment process and identify adverse environmental effects of a project are identified. Our work include: Environmental and Social Impact Assessment (ESIA), environmental Impact Assessment (EIA), environmental Project Brief (EPB), Strategic Environmental Assessment (SEA), Quality Management Systems Audits, Environmental Management Systems Audits, Safety Audits, Environmental Management Plans/monitoring plans. Call us today!

Regulatory Compliance Assurance and Approvals

We offer a wide range of services which include registration and/or subscription and regulatory compliance assistance with regulatory agencies and authorities such as Zambia Environmental Management Agency (ZEMA), Energy Regulation Board (ERB), National Construction Council (NCC), Local authorities, Zambia Agriculture Research Institute (ZARI), Road Development Agency (RDA). These include chemical registration, change of land use, road infringements and access, Drawings approvals, Construction Licenses, project registration. Call us today!

Quality Health and Safety

The quality and Safety team can perform safety studies to help you meet required legislation and minimise the risks of major accidents. Our assessment takes a complete overview of your site's plant and equipment. We look at your architecture, engineering, technical offices and administration systems. We can also work with multi-talented facilities and include investigations of your insurances, inspection bodies and health and safety committees. We can also help you with staff training and can assess your safety drills and procedures.

Environmental Monitoring and Regulatory Licenses

We have a dedicated team that will establish monitoring protocols for you and ensures you get the best value and highest level of standards of services to ensure your compliance with the best operating practices and both international and local standards. At Tsalach, we provide services for registration of agrichemicals/industrial chemical registration, monitoring of emissions from boilers or smelters, noise monitoring, dust monitoring, water quality monitoring, ambient air quality, labels design, and registration, preparation of dossiers waste management, emissions licenses, and Ozone Depleting Substances. Call us today!

Remediation and Emergency Responses and Spill Clean-Ups

We offer remediation services for waste including all wastes and hazardous waste. These include all media, groundwater, surface water, soils, and sediments, and debris, that are managed for implanting clean-up. Incidences include: Roadside Spills– We handle tanker rollovers, chemical spill, and fuel spills. We will contain roadside spills incidents involving both hazardous and non-hazardous materials. Pipeline incidents – Clean Management can be on the scene to control the spread, clean up the area, and report emergency pipeline incidents, such as spills, ruptures, and leaks. Hazardous and Non-Hazardous Emergencies – We manage emergencies involving hazardous materials that pose an immediate threat to the environment and those including non-hazardous substances. Remediation Services – Remediation involves the removal of hazardous materials from four kinds of contaminated sites: groundwater, surface water, soil, and sediment. Call us for quick spills clean-ups and remediation.

We value clients and their success. At Tsalach Global Limited we build lasting relationships with our valued clients. We have formed successful relationships with corporations at local and national level – working with private, listed and Government organizations.

Specialized Studies

Conducting due diligence for new and existing facilities; Environment Protection Fund Assessments; Life Cycle Analysis; Environmental Management Systems; Develop Company Environment Health and Safety Policies; Setting up Environmental Management Systems; Biodiversity Studies, Water Balance, Energy Balance in your operations.

Through our established relationships we aim to be responsive, efficient, technically accurate, and provide value-for-money solutions. Service and relationships are the cornerstones upon which we continue to build stronger and closer relationships. We are committed to pioneering new ways of working together to continue to secure success.

Our purpose as a team is to provide sustainable, innovative, and cost-effective environmental solutions to further our clients' success and to provide fulfillment to our stakeholders. Through this, we deliver professional excellence to our clients.
